ID	Comment	Recommendation
#01	The readme file does not specify the name of the resource for which the tests were written and there is no command to view the report.	Need to add a tested resource and add step how to run run test and view report
#02	Main branch contains DOCS folder with report	Need to move "docs" folder from main branch to another branch
#03	report: "npx allure generate reports/ui/allure-results --clean -o reports/ui/allure-report && allure open reports/ui/allure-report"	meaningless command
#04	The file myAccount.test.ts, the test inside does not check anything	Need to remove this file
#05	The loginPage.ts file contains wrong function name	I do not like the name of the function "launch Application", in fact we do not start the application but open the website. Need to rename function.
#06	There is no test cases description file	Need to add test-cases file
#07	There is no assertions in some tests	Need to add assertions in all tests
#08	The "Login with valid credentials" and "Login with valid credentials read data from fixture"	Need to remove one of these tests
#09	In tests with a successful login, there is no point in logging out, this is another test.	I think need to separate tests
#10	Wrong assertion in the "login with wrong email format credentials read data from fixture" test	Need to fix the "adressssss" assertion text
#11	Assertions in page files	Need to move all assertions to spec files
#12	Move the locators outside the class in page files	Use "const" to declare outside the class
#13	Name of "emailAddressTxt" and "passwordTxt" locators	Need to rename it to "emailAddressFieldLocator" for example
#14	There are some default values in config files	Need to delete default values from config files
